## Whatsapp

You will need to download and install Whatsapp for Windows on your computer, and link your device to be able to use Whatsapp with Intelligence.

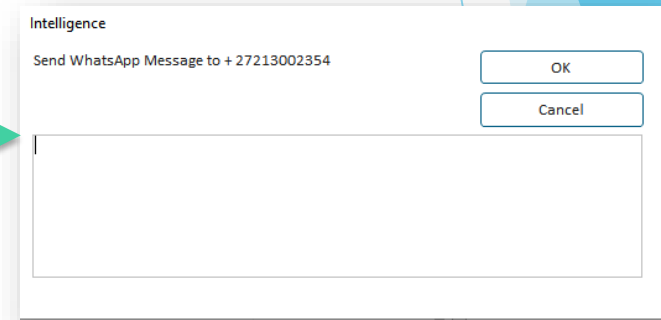

The benefit of using Whatsapp with Intelligence is that it is a quick and informal channel of communication, and you don't need to save the number on your phone's contacts first.

If the candidate or company contact has a mobile number recorded, then you will see the Whatsapp icon displayed on the Candidate or Client screen.

Select the Whatsapp button to open the Whatsapp message form - simply type in your message and click on OK to send.

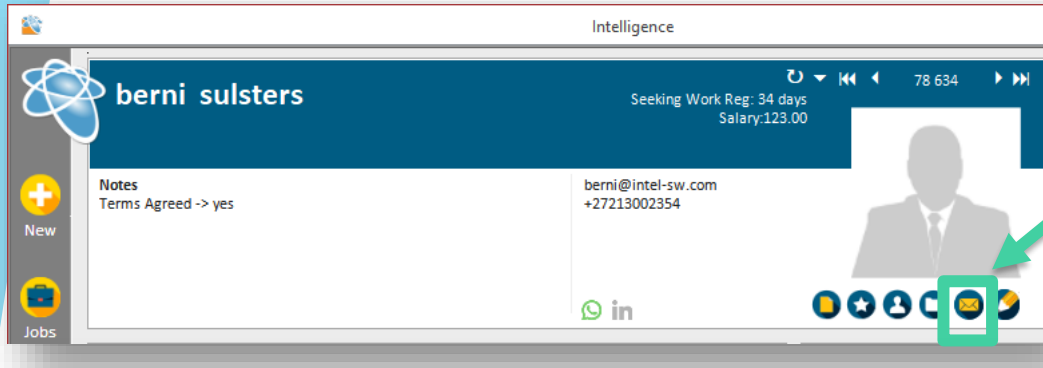

You will need to still press send in your Whatsapp for Windows application on your computer.

The message will be recorded in Communications against the appropriate profile. Only the outgoing message will be recorded.

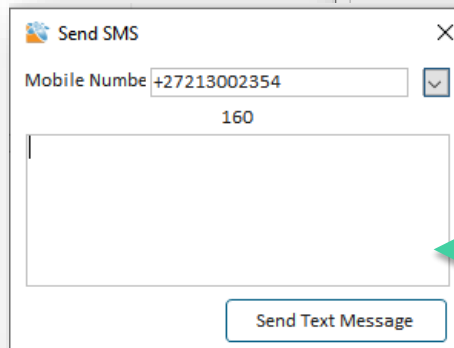

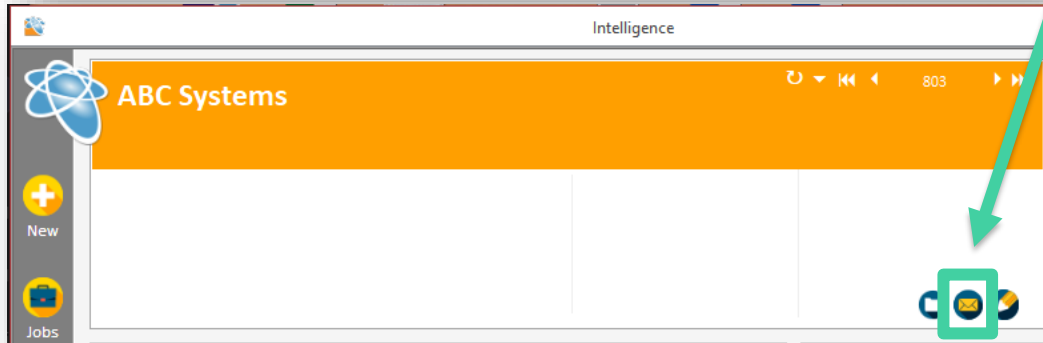

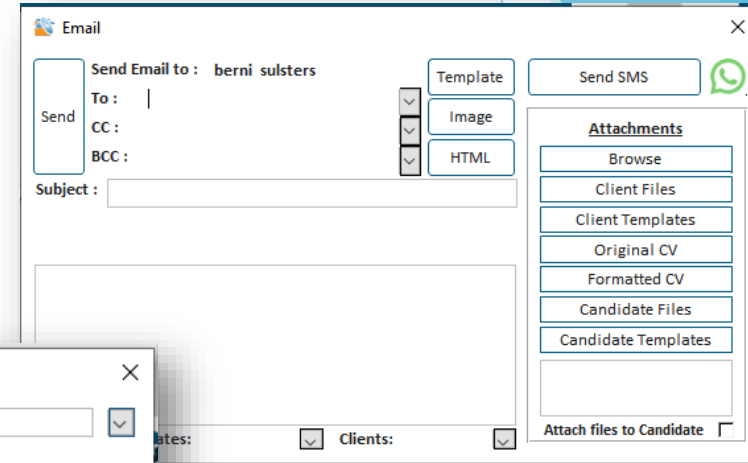

## SMS

You will need to purchase SMS credit bundles from TextAnywhere (UK based) to use the SMS feature with Intelligence. Please contact us for more information on this feature.

Click on the Email button to open the Email/SMS form.

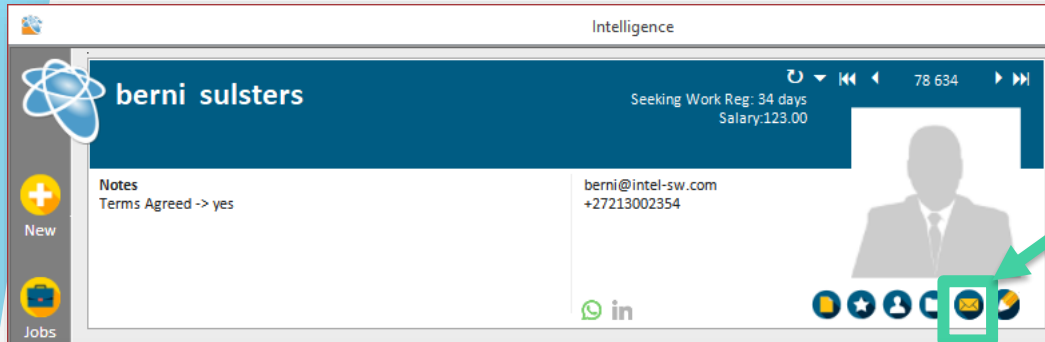

Simply type in your message and send.

You can also send an SMS based on previous messages. This is particularly useful when working through a shortlist and quickly contacting candidates.

The message will be recorded in Communications against the appropriate profile.

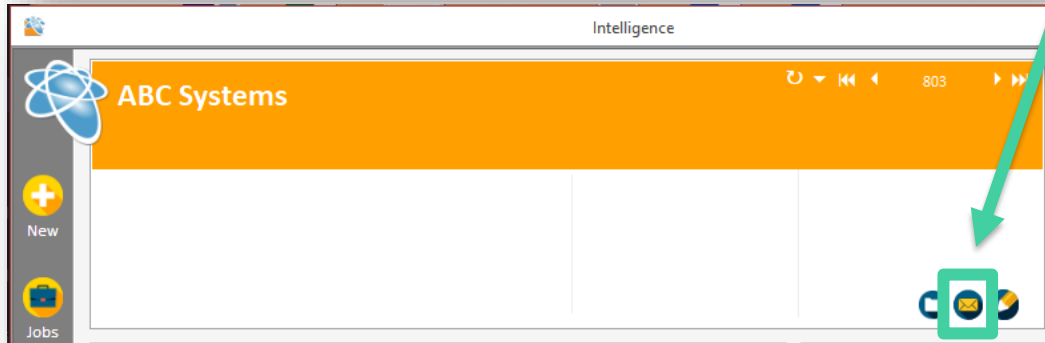

## Emails

Send an email from Intelligence. Type up your own emails or use predefined templates that pull data from any part of Intelligence.

Click on the Email button to open the Email/SMS form.

The 'Email' form is open, showing fields for 'Send Email to: berni sulsters', 'To: berni@intel-sw.com', 'CC:', and 'BCC:'. There is a 'Subject:' field and a large text area for the message body. On the right side, there are buttons for 'Template', 'Image', and 'HTML'. Below these are 'Attachments' options: 'Browse', 'Client Files', 'Client Templates', 'Original CV', 'Formatted CV', 'Candidate Files', and 'Candidate Templates'. At the bottom, there are checkboxes for 'Contacts: Candidates' and 'Clients', and a checkbox for 'Attach files to Candidate'.

You can add a subject line and message, attach documents from the current candidate or client record – this will copy to a new Email message in Outlook, where you can double check your email before sending.

The message will be recorded in Communications against the appropriate profile.

## Setting up Email Templates

Set up your own predefined email templates that pull data from any part of Intelligence. These templates are saved locally on each person's computer, so you can set up templates specific to each user.

1. Select Template and either select the template you wish to use, or select Add/Edit Template to set up a new template or edit an existing template. You can add images or merge fields, or edit in HTML directly.

2. From the 1<sup>st</sup> drop-down list, select an existing template to edit, or select Create New Template.

3. Type in the text required.

4. Select the merge field from the 2<sup>nd</sup> drop-down list to insert that value into your text.

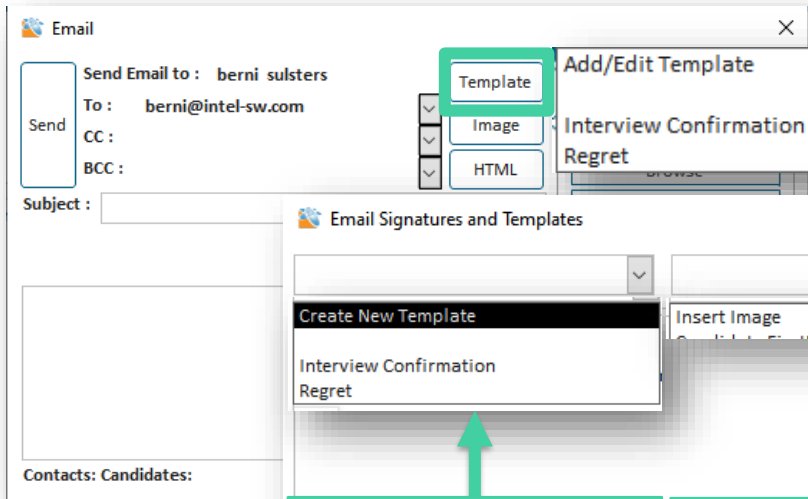

5. The finished template will look like the example below. Save and Close when it is complete.

5. The finished template will look like the example below. Save and Close when it is complete.

## Setting up your Email Signature

Set up personalised email signatures that will be appended to outgoing emails. This signature is saved locally on each person's computer.

1. Select Template and select Add/Edit Template to set up your email signature. You can add images or merge fields, or edit in HTML directly.

5. The finished template will look like the example below. Select Set As Signature and Close when it is complete.

A screenshot of the 'Email Signatures and Templates' dialog box. The 'HTML' tab is selected. The 'Create New Template' option is selected in the first drop-down list. The 'Insert Image' option is selected in the second drop-down list. The dialog box contains a text area for the signature and buttons for 'Delete', 'Set as Signature', 'Set as Default', 'Cancel', and 'Save'.

2. From the 1<sup>st</sup> drop-down list, select Create New Template.

3. Add your email signature as required.

4. If you want to insert a logo or image, click on the 2<sup>nd</sup> drop-down list and select Insert Image.

This Template should be RichText, which is a limited form of HTML, and may include Intelligence Merge Fields. It can be full HTML without merge fields if it is set as a signature, as this will be appended to the email when it is sent without being converted to Rich Text. Editing a template on this form may automatically convert it to Rich Text unless it is being viewed as HTML.

A screenshot of the 'Email Signatures and Templates' dialog box showing a completed signature. The 'HTML' tab is selected. The signature text is: 'Warm regards', 'Berni Sulsters', followed by an image tag: '--image:sig\Berni signature\newcolourlogo.jpg:width='606' height='234'--', and contact information: 'SA +27 21 300 2354', 'UK +44 2890 998 688', and 'Skype: [intelligencesoftwareberni](#)'. The dialog box contains buttons for 'Delete', 'Set as Signature', 'Set as Default', 'Cancel', and 'Save'.
